Education: Doctor in Physics in 1990 and PhD in Physics in 1995 from the University of Torino, Italy.

Position: Senior Research Astronomer at the Osservatorio Astrofisico di Torino (INAF-OATo), Italy, since 1999.

Areas of Expertise: astrometry, stellar photometry, stellar surveys, Milky Way and Local Cosmology

Research activities

My main scientific interests are in the field of ground-based and space astrometry, in the construction of wide field surveys for the study of the Galactic stellar populations and the chemo-dynamical evolution of the Milky Way.

Project Coordination, Membership

Member of the FAST Consortium of the HIPPARCOS satellite (1989-1996).

Member of the OATo-STScI collaboration for the construction of the Second Guide Star Catalog (GSC-II) (1992-2007).

STScI consultant for the studies of the guide star system of NGST (1999).

Member of the DPAC of the ESA astrometric mission Gaia, since 1997

Coordinator of the OATo team participating in the Gaia ESO Survey (GES), since 2011

Member of the OATo team responsible for the construction of the Input Star Catalogue (ISC) of the guiding system of the Euclid mission

Coordinator of the OATo responsible for the study of the Input Star Catalogue (ISC) of the guiding system of the SPICA mission (2020)
